IX Ibero-American Summit on Family Medicine

May 21-22, 2025

Montevideo, Uruguay, South America

The Summit is an eminently political event that fosters the exchange and strengthening of policies, indicators, and management tools in Primary Care and Family Medicine within the Ibero-American Region. We have a 23-year history of organizing Summits in the Region.

Summit Objectives:

- Reflect on the health systems of the Region.
- Contribute to the establishment of a more sustainable and planned development process for Family Medicine within the framework of the Primary Health Care strategy.

Declarations:

The analysis of the specific situation that calls for the Summit, as expressed in the motto, is done through teamwork involving political, academic, and civil authorities alongside experts from the Ibero-American Confederation of Family Medicine (CIMF), and is then formalized in the corresponding declaration, signed as a commitment by all participants.

These declarations become guiding frameworks for the Region.

The motto of the IX Ibero-American Summit of Family Medicine in Montevideo: Family and Community Medicine is more essential than ever.

WONCA-Iberoamericana-CIMF

Topics:

- How to achieve or maintain the number of specialists necessary for the transformation of health systems in the Region.
- What are the essential competencies of Family Medicine in the 21st century?
- Experiences working in the community and innovations for responding to health emergencies.
- Technology in Family Medicine.
