

Movimento Waynakay Iberamericana CIMF region

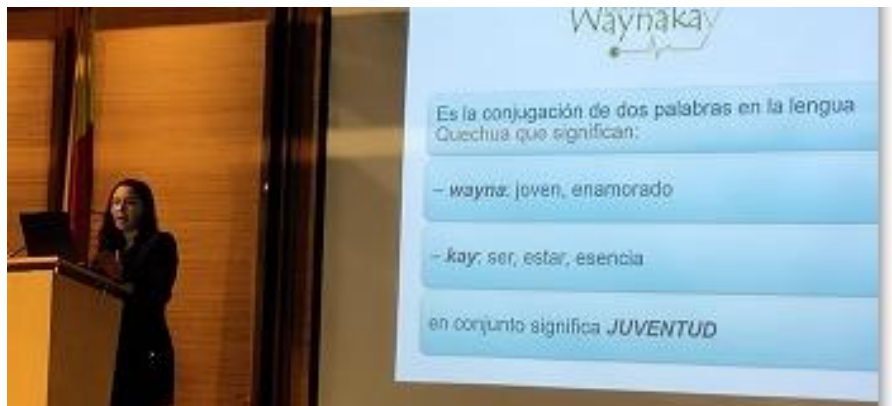

During the last three months, the Latin American Young Doctors' Movements have had a huge amount of work - usually, all conferences and meetings take place in the second half of the year.

There have been several Waynakay activities as shown by the photos below.

Waynakay Argentina had, for the first time, a massive meeting during the Famfyg conference on September 2019, and there was a preconference, too. (Photo above)

Colombia presented the Waynakay Movement and after that, many young doctors felt summoned to participate. (photo right)

Ameyali Waynakay (Mexico) participated in the Resident National Conference in Mexico, where many YDM delivered their presentations.

Alejandro Saldaña is the Ameyali Waynakay (Mexico) Chair - at the last National Residents Conference in Mexico he talked about the Movement.

On Saturday November 16th, the second YDM meeting took place in Paraguay, where hard work is underway to maintain active participation.

The FM 360 program has also been rejuvenated in the region. We have a new Exchange team, and now we are regionally coordinated by Elizabeth Portilla from Mexico and Karla Monteiro from Brazil. They are working hard to improve internal communication and have initiated a hosts' update (information that will be shared with the other regions soon).

Finally, we want to express our support and solidarity with nations that are suffering violent events, hoping that peace will come back as soon as possible.
