

THE FOUR PILLARS OF WFDD CAMPAIGN 2021

AND PRIMARY CARE TEAMS!

We wish to highlight that family doctors working together with multidisciplinary teams of health and care professionals are key to strengthening health systems and delivering high quality and affordable care to all.

AND PATIENTS!

Family Doctors adopt a people-centred approach, provide ongoing support to patients and communities, and ensure continuity of care over lifetime. Patients are at the centre of this celebration.

AND NEW TECHNOLOGIES!

Amid the Covid-19 pandemic, new technologies have emerged as fundamental tools for healthcare professionals to continue their mission.

AND YOU!

What are the building blocks that YOU consider key for the future? Get involved, raise your voice, share your activities and efforts, and contribute to building the future with family doctors!
