

World Organization of Family Doctors (WONCA)

Organizational Equity Committee (OEC)

Statement on LGBTQ

All family doctors are responsible to provide the highest quality of clinical care possible to their patients irrespective of each patient's age, disease or disability, creed, ethnic origin, gender identity, nationality, political affiliation, race, sexual orientation, social standing or any other factor.

People identifying as lesbian, gay, bisexual, transgender, and queer/questioning (LGBTQ) have the human right to have accessible, affordable and high-quality care to meet their health needs.

World Organization of Family Doctors (WONCA) acknowledges the health needs of people identifying as LGBTQ and urges all clinicians and medical organizations, as well as all governments and global organizations, to provide just, equitable, dignified, high quality health care to LGBTQ people in each community where they reside.
